

22mm Clear NTAG210μ

A clear 22mm round NFC sticker with NXP's economical NTAG210μ NFC chip. High quality construction and a strong ScanStrength performance for the size from this small tag.

The lower memory NTAG210μ chip reduces the cost by reducing the memory but not the scan performance. Able to store a URL up to 40 characters long (excluding the https://). Ideal for use inside product or packaging applications where space is at a premium.
